

Okanagan Lake Access Study

Overview of Individual Rights of Way

Site 31 – Located off Peters Road, west of the Eastside Road intersection

This is a beautiful quiet site, with a long, narrow, densely vegetated access. Above the right of way, is the Predator Ridge Pumphouse, which presents an opportunity for excellent views.

Priority: 17

Overview of Site:

- The site is a long, narrow access, lined with areas of riparian vegetation.
- With management of the vegetation, this site could provide a very pleasant, quiet, secluded waterfront site.
- There is room for parking along eastside Road and along Peters Road.
- The Predator Ridge Pumphouse, with the agreement of GVSC, could be a significant addition to the recreational experience in this area, in that it appears that it could readily be retrofitted to provide a viewing platform, and parking could be provided adjacent to it.
- The site accommodates stormwater drainage facilities

Recommended Actions:

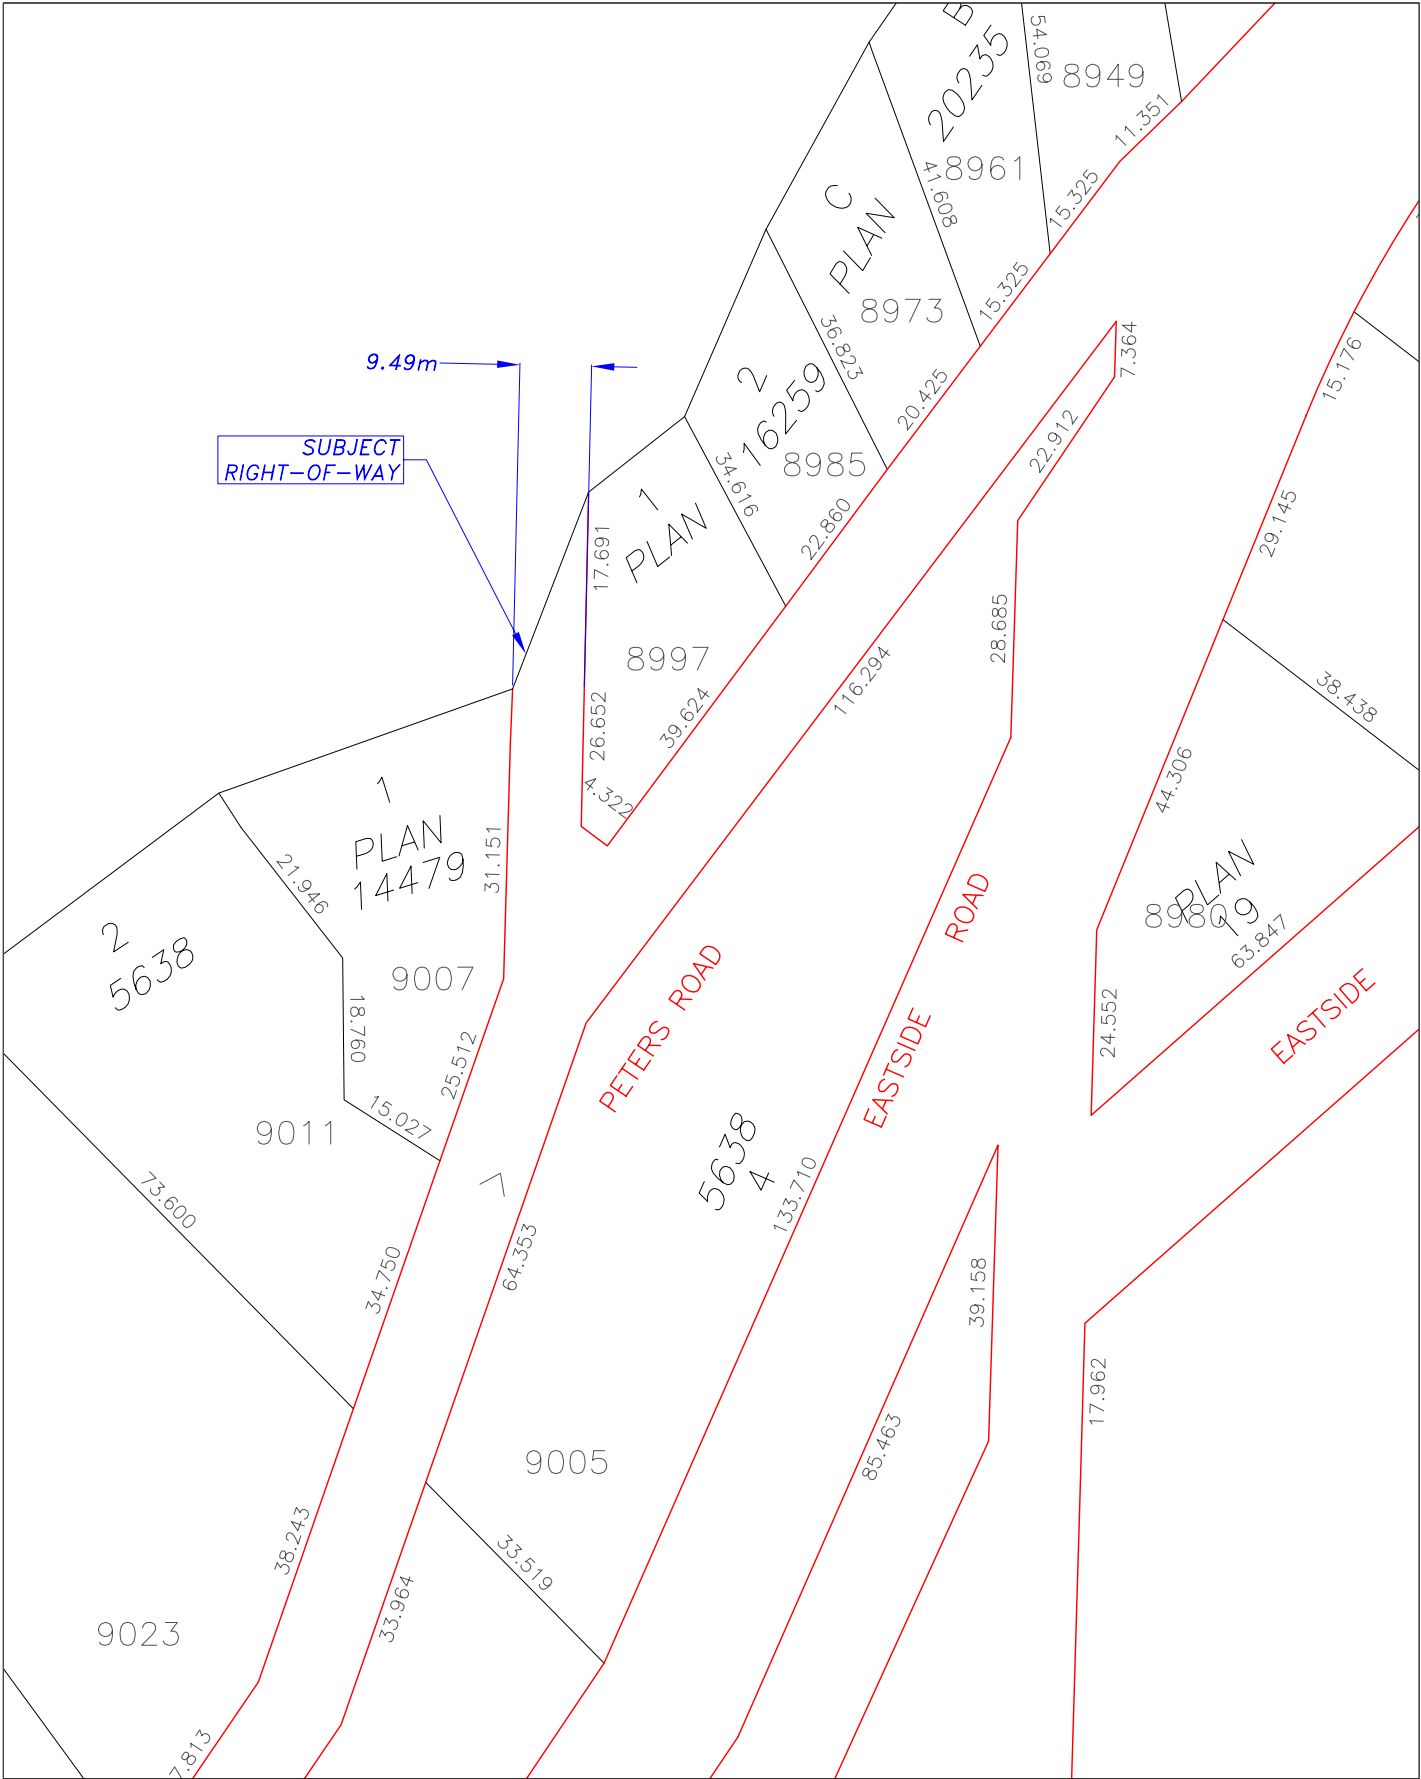

- Construct improvements to the site as per the accompanying plans, including pathway and picnic tables
- construct parking along Peters Road and Eastside Road
- Work with GVS, Water, to enable improvements to the Pumphouse to construct a viewing platform.

Estimated Budget:

The estimated cost of the works identified \$ 29,680.

Specific Considerations:

- Given the secluded nature of this site, there could be an impact on the adjacent properties which will need to be dealt with through the design process.
