### **Vernon Aquatic Centre to close February 14 for unexpected preventative maintenance**

The Vernon Aquatic Centre will be closed Thursday, February 14 to perform unexpected preventative maintenance to replace a damaged part of the Lap Pool Air Handling Unit (AHU). It is estimated that the repair will take 8 to 16 hours to complete.

In order to complete the repair, the AHU needs to be turned off which may result in a buildup of carbon dioxide and chloramines in the pool area. In order to maintain the safety of the pool patrons and staff we are closing the pool to public until the AHU is repaired.

The Vernon Aquatic Centre is expected to reopen for regular hours Friday, February 15.

We thank you for your cooperation.
