TELEPHONE: 250-550-3539

Overnight work required on portion of 31st Street for sanitary sewer main flushing and inspection

The City would like to advise the public of a sanitary sewer main flushing project that will require overnight work on a portion of 31st Street this week. Part of the project includes CCTV inspection of the infrastructure, which means the work needs to be done when there is minimum flow moving through the sewer system.

Starting Wednesday, July 22, crews will be doing the work between 35th Avenue and 39th Avenue. The work is expected to be completed by Friday, July 24, and will run between 9:00 p.m. and 5:30 a.m. daily.

While flushing is taking place, residents in the surrounding area may hear some noise. Every effort will be made to minimize disruptions, however, it is recommended area residents keep their windows closed overnight, if possible.

The project may also require temporary overnight closures on 37th Avenue between 30th Street and 28A Street; however, the area will be open during the day.

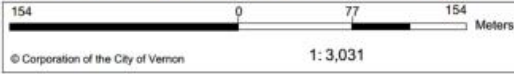

The City apologizes for any inconvenience this disruption may cause and appreciates your patience while this project is completed in a timely manner.
