Work to begin on final phase of Delcliffe Road area drainage improvements

The City would like to advise residents that work is set to begin next week on the final phase of drainage improvements in the Delcliffe and Cameron Road area.

The work will require the regrading of existing asphalt in the area, which will require the temporary removal of parking spaces at the lake access site on Delcliffe Road.

The work is expected to begin as early as Tuesday, June 28 and will take approximately three weeks to complete. Please note, this timeline may change if delays or emergencies arise.

Some delays should be expected for motorists in the area; however, every effort will be made to minimize disruptions. Please remember to watch for construction workers, slow down in work zones, and follow all traffic control measures.

The City appreciates everyone's patience while this project is being completed.

A map of the work area is available below
