### **New electric vehicle charging stations to be introduced at City Hall**

The City is taking another step towards meeting its climate action goals by introducing more charging options for electric vehicle users.

The City of Vernon will be introducing six (6) new electric vehicle charging ports to the parking lot adjacent to City Hall and the Community Services Building (3400 30<sup>th</sup> Street).

The new Level 2 chargers will replace two older model chargers and will be a part of the Flo network, making it easier for residents and visitors to find a charger for their electric vehicle.

The new chargers were purchased using a CleanBC rebate from the provincial government, which was acquired after installing similar chargers at Civic Memorial Park.

The new chargers are expected to be online by next week. Until the new chargers are operational, residents are reminded that EV chargers are available at nearby Civic Memorial Park (3033 37<sup>th</sup> Avenue) and behind the BC Transit Bus Exchange, near 31<sup>st</sup> Street and 31<sup>st</sup> Avenue.

For complete list of electric vehicle charging stations within the City of Vernon, visit <https://pluginbc.ca/charging/finding-stations/>
