

Exciting things are in the works

PROJECT INFORMATION

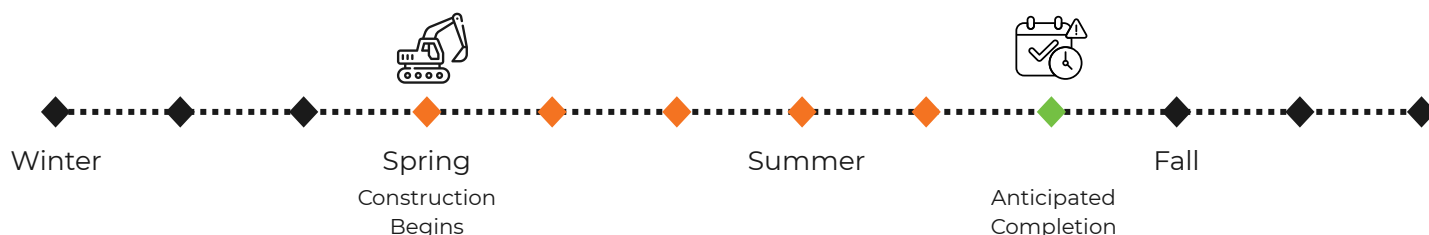

43rd Ave Roundabout

43rd Ave Corridor Improvements

Moving traffic, improving safety, and connecting the community.

Infrastructure Investment: \$4,230,000

Funding Source: Community Works, Sanitary Sewer Reserves, DCC Roads

Timeline: Spring - Summer 2026

*Schedules are subject change due to weather, contractor timelines and other factors.

Current intersection

Concept of roundabout and entrance view

We're upgrading the intersection of 43rd Avenue, Alexis Park Drive, and Old Kamloops Road with a modern roundabout to improve traffic flow and safety for all road users, while also providing a key connection to the Active Living Centre.

The 43rd Avenue roundabout and corridor improvements are designed to enhance traffic flow, safety, and accessibility along this key transportation corridor. The new roundabout will help reduce vehicle speeds, improve intersection efficiency, and improve safety for motorists, cyclists, and pedestrians.

In addition to the roundabout, corridor improvements will support safer travel for all users through upgraded road infrastructure, pedestrian connections, and active transportation features. Together, these enhancements support City of Vernon's commitment to building safer, more efficient streets while supporting long-term growth and connectivity.
