

Exciting things are in the works

PROJECT INFORMATION

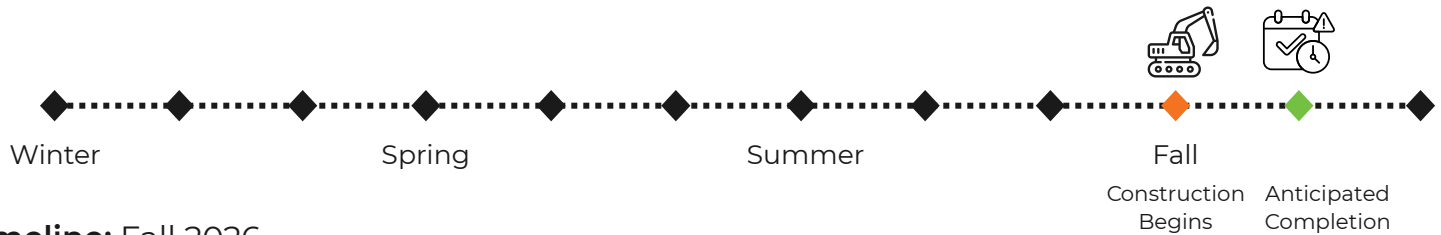

Cemetery Upgrades

Cemetery Columbarium

Developing a peaceful and sustainable memorial space.

Investment: \$210,000

Funding Source: Cemetery Development

Timeline: Fall 2026

*Schedules are subject change due to weather, contractor timelines and other factors.

Concept of Phase One

Future phases of the project showing the completed concept

Creating a serene and accessible columbarium to meet growing community needs for memorial space.

The Columbarium Development Project will create a dignified and sustainable resting place for cremated remains, responding to the community's growing need for alternative interment options. Thoughtfully designed to make efficient use of limited cemetery land, the project supports long-term planning while respecting the cultural and emotional importance of memorial spaces.

Set within a landscaped and fully accessible environment, the columbarium will include seating areas for quiet reflection and remembrance. The design prioritizes comfort, accessibility, and serenity, offering families and visitors a peaceful place to honour loved ones while ensuring the space remains welcoming, functional, and enduring for future generations.
