

# Exciting things are in the works

PROJECT INFORMATION

## Sanitary Sewer Extensions

### Okanagan Landing

Extending reliable sewer infrastructure where it's needed most.

**Investment:** \$300,000

**Funding Source:** Infrastructure Reserve, Sewer Reserve

**Timeline:** Spring - Fall 2026

\*Schedules are subject change due to weather and other factors.

Sewage line work in progress

Map of sewage service expansion

New sewer lines close service gaps in Okanagan Landing, promoting the protection of Okanagan Lake water quality.

This project extends the City's sanitary sewer system to some remaining un-serviced areas in Okanagan Landing, improving access to reliable, modern infrastructure. The work supports long-term neighbourhood health while allowing homeowners to connect when they're ready. This extension of the sanitary sewer collection system is one of the key action items in the City's Liquid Waste Management Plan.
