Funding Source: DCC Storm, Infrastructure Reserve

Winter

Spring

Summer

Fall

Construction Begins

Anticipated Completion

Timeline: Spring - Fall 2026

*Schedules are subject change due to weather and other factors.

We're completing planned drainage improvements in the Okanagan Landing Road and Eastside Road area.

This area was identified through the Drainage Infrastructure Prioritization Plan. The Drainage Infrastructure Prioritization Plan helps identify where drainage improvements are most needed.

The plan is designed specifically for Vernon's climate, terrain, and infrastructure, and is focused on addressing new or emerging high-priority drainage issues as they arise.
